CoreChain
DIGITAL ASSET INVESTMENT

INVESTOR OVERVIEW · 2026

Digital asset investing with a ledger you can verify.

Bitget execution connectivity. BEP20 settlement on BNB Smart Chain. One account for the plan, the payout trail and your 15-level income network.

Daily 2% plan | BEP20 settlement | 15-level income | Singapore support

Capital at risk. CoreChain does not claim authorisation or regulation by any financial regulator. Bitget is an independent third-party execution venue. This document is information, not an offer or financial advice.

One platform. Four clear layers.

CoreChain brings the investment plan, the ledger, the execution route and the payout proof into one investor dashboard.

01

One daily plan

A single Daily 2% Plan with a $10 minimum, no maximum and a 24-hour activation wait.

02

Visible execution

Orders route through authorised Bitget execution connectivity and are reconciled before the ledger updates.

03

On-chain payouts

Completed BEP20 withdrawals carry a BNB Smart Chain transaction hash for BscScan verification.

04

15-level income

Approved downline deposits can generate one-time commission across 15 levels, with a 15% combined rate.

HOW IT WORKS

From account to verified payout.

Four steps keep the user journey simple while the platform records what happened behind the scenes.

4-STEP JOURNEY

STEP 01

Create your account

Register with the platform invitation code **corechain** or a sponsor code, then sign in securely.

STEP 02

Choose the plan

Review the Daily 2% Plan terms and use the dashboard calculator before funding.

STEP 03

Fund and activate

Submit a deposit. After administrator approval, the 24-hour eligibility window begins.

STEP 04

Track and withdraw

Follow eligible profit, downline income and withdrawal hashes in the ledger.

24h WAIT AFTER APPROVAL

The profit clock starts after a deposit is approved and the waiting period completes.

2% DAILY PLAN RATE

Calculated on the total approved deposits that are eligible for that cycle.

15 INCOME LEVELS

Level income is based on approved downline deposits, not on a user's own deposit.

ONE PLAN
Start from $10

24-HOUR WAIT
Before eligibility

LEDGER
Every step recorded

THE PLAN

The Daily 2% Plan.

One plan, deliberately simple. The same terms apply whether an investor starts with $10 or adds more later.

ONE PLAN ONLY

Daily 2% Plan

Deposit from $10, add funds at any time, and earn 2% every 24 hours after each deposit completes its 24-hour waiting period.

2.0%

daily plan rate · illustrative, not guaranteed

Minimum $10 | No maximum | 24h activation

Minimum deposit	$10
Maximum deposit	Unlimited
Daily rate	2.0%
Profit cycle	24 hours
Eligibility wait	24 hours
Withdrawal minimum	$10

Important: A plan rate is not a promise of future performance. Daily profit depends on approved, eligible deposits; capital remains at risk and can be lost.

START SMALL
$10 minimum · unlimited maximum

ACTIVATION
24 hours after approval

PROFIT CYCLE
At most once every 24 hours

ROI MECHANICS

How the daily ROI is calculated.

The plan uses the total approved deposits that have completed the 24-hour wait. It is not based on an unrelated contract balance.

FORMULA

Eligible deposits × 2% = daily profit

Only approved deposits older than 24 hours are included. Profit is credited at most once per 24-hour cycle and recorded as a ledger entry.

$1,000 × 2% = $20

Illustrative daily profit on an eligible $1,000 deposit before withdrawals or any reinvestment.

Compounding note: if profit is withdrawn, the eligible deposit base does not grow from that profit. Adding a new approved deposit can increase the base.

ELIGIBLE DEPOSIT	DAILY 2%	30 DAYS	90 DAYS
$100	$2.00	$60.00	$180.00
$1,000	$20.00	$600.00	$1,800.00
$5,000	$100.00	$3,000.00	$9,000.00
Illustrative only	**2% per day**	**30 cycles**	**90 cycles**

The table assumes the deposit remains eligible for every cycle, no withdrawals, no reinvestment and no change in plan terms. It is an illustration, not a forecast or guarantee.

ELIGIBLE BASE
Approved deposits only

FORMULA
Eligible deposits × 2%

RISK
Returns are not guaranteed

GROWING YOUR EARNING BASE

Four levers that can increase earnings.

Earnings are not automatic; each lever depends on approved deposits, eligibility and plan performance.

ILLUSTRATIVE

01

Add eligible deposits

A larger approved deposit base produces a larger 2% daily calculation, subject to eligibility.

02

Keep deposits eligible

Approved deposits that have passed the 24-hour wait are included in the cycle.

03

Build network volume

Each approved downline deposit can generate one-time level income across up to 15 levels.

04

Reinvest deliberately

Adding profit back as a new approved deposit can enlarge the eligible base, but increases exposure and risk.

Daily base comparison

$100 eligible	$2 / day
$1,000 eligible	$20 / day
$5,000 eligible	$100 / day
$10,000 eligible	$200 / day

What can slow growth

Withdrawing profit	Base stays lower
Deposit not approved	No profit
24-hour wait	Not yet eligible
Plan changes	Terms may change

15-LEVEL INCOME NETWORK

Income that follows a verified network.

Level income is a one-time referral commission on an approved downline deposit. It is not a daily ROI and is not paid on your own deposit.

MAXIMUM 15% COMBINED

Level 1	5.0%
Level 2	3.0%
Level 3	1.0%
Levels 4–15	0.5% each
Combined rate	15.0%

Depth matters.

The dashboard shows approved downline volume, active levels, the deepest active level and the commission already credited to your wallet.

15

levels visible in the network structure

> **Example:** a $1,000 approved deposit by a partner at each of the 15 levels produces $150 in combined level commission — 5% + 3% + 1% + twelve 0.5% amounts. Each commission requires a separate approved deposit in that level.

STRUCTURE
Levels 1 through 15

COMBINED RATE
15% one-time commission

REQUIREMENT
Approved downline deposits

LEVEL INCOME EXAMPLE

$150 across a full 15-level chain.

This is a worked example, not a projection. It assumes one approved $1,000 deposit by a different partner at every level.

WORKED EXAMPLE

Level 1 — 5% of $1,000	$50.00
Level 2 — 3% of $1,000	$30.00
Level 3 — 1% of $1,000	$10.00
Levels 4–15 — 0.5% × 12	$60.00
Total level income	**$150.00**

One-time, not daily. The $150 is credited once per approved downline deposit as level commission. It is not a recurring daily payment.

No self-income. Your own deposit does not generate level commission for you; the income follows the upline of the depositing member.

No guaranteed depth. A partner must actually join and fund at each level for the corresponding commission to arise.

Withdrawable balance. Credited commission enters the wallet and is subject to the platform's KYC and withdrawal rules.

LEVELS
1 through 15

COMMISSION
One-time per approved deposit

WALLET
Withdraw after KYC

DEPOSITS & WITHDRAWALS

Money movement with clear rules.

Deposits are reviewed before they become eligible. Withdrawals are reviewed and then settled in BEP20 on BNB Smart Chain.

BEP20 · BSC

DEPOSITS

Minimum	$10
Maximum	Unlimited
Status	Pending → Approved
Profit eligibility	24h after approval

A deposit is credited only after administrator review. The reference must be unique.

WITHDRAWALS

Minimum	$10
Handling fee	2% added
Request limit	Once / 24h
KYC	Approved first

A $100 request has a $2 fee, a $102 wallet deduction and a $100 payout before network conditions. Completed payouts show a BscScan hash.

BEP20 addresses only: use a 0x address with 40 hexadecimal characters. Transfers on the wrong network or to the wrong address may be irreversible.

SECURITY & CONTROLS

Protection around the account and the payout.

The platform combines access controls, administrator review and server-side key isolation.

CONTROLS

01

KYC before withdrawal

Identity verification must be approved before withdrawal access is enabled.

02

2FA & session security

Optional TOTP two-factor authentication, hashed passwords and HTTP-only signed sessions.

03

Admin approval lock

A withdrawal moves from pending to processing under an atomic lock, preventing double approval.

04

Server-side key isolation

The BSC signing key is read only by the server-side withdrawal service and never shown in the browser.

On-chain verification: a broadcast transfer is only marked completed after the configured confirmation. A reverted or unverified transfer is not treated as paid.

KYC
Withdrawals gated

2FA
Optional account protection

DASHBOARD & MOBILE APP

Your numbers, in one place.

The investor dashboard and Android app keep the plan, ledger and network view close at hand.

WEB + APK

Daily ROI view

Eligible deposits, projected daily profit and the next 24-hour cycle.

Transaction ledger

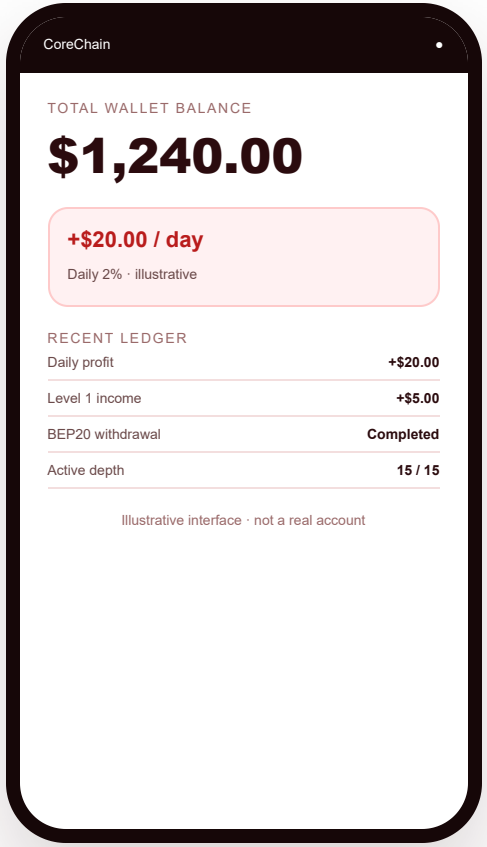

Deposits, withdrawals, profits and level commissions with status and references.

15-level planner

Approved volume, active depth, level rates and an illustrative income planner.

BEP20 payout trail

Withdrawal hashes open directly on BscScan for independent checking.

RISK & RESPONSIBLE INVESTING

Understand the risk before you commit.

A visible plan and on-chain settlement do not remove market, operational or technology risk.

READ BEFORE INVESTING

- **Capital is at risk.** Digital-asset values can fall as well as rise, and you may get back less than you deposited.
- **Level income is not fixed.** It requires approved downline deposits and actual network depth.
- **BEP20 transfers are irreversible.** Use the correct BNB Smart Chain address; wrong-network transfers may be lost.
- **Not financial advice.** Nothing in this document is personal investment, tax or legal advice.
- **Plan rates are not guarantees.** The 2% daily rate is a plan term, not a promise of future performance.
- **Bitget is independent.** Its services are subject to its own terms and do not guarantee CoreChain products.
- **No regulator endorsement.** CoreChain does not claim authorisation or regulation by any financial regulator.
- **Operational risk exists.** Platform, network, exchange and confirmation delays can affect timing.

Responsible approach: only commit funds you can afford to lose, understand the plan's 24-hour eligibility rule, and review the full risk warning on the website before registering.
