Digital asset investing with a ledger you can verify.

Bitget execution connectivity. BEP20 settlement on BNB Smart Chain. One account for the plan, the payout trail, and your 15-level income network.

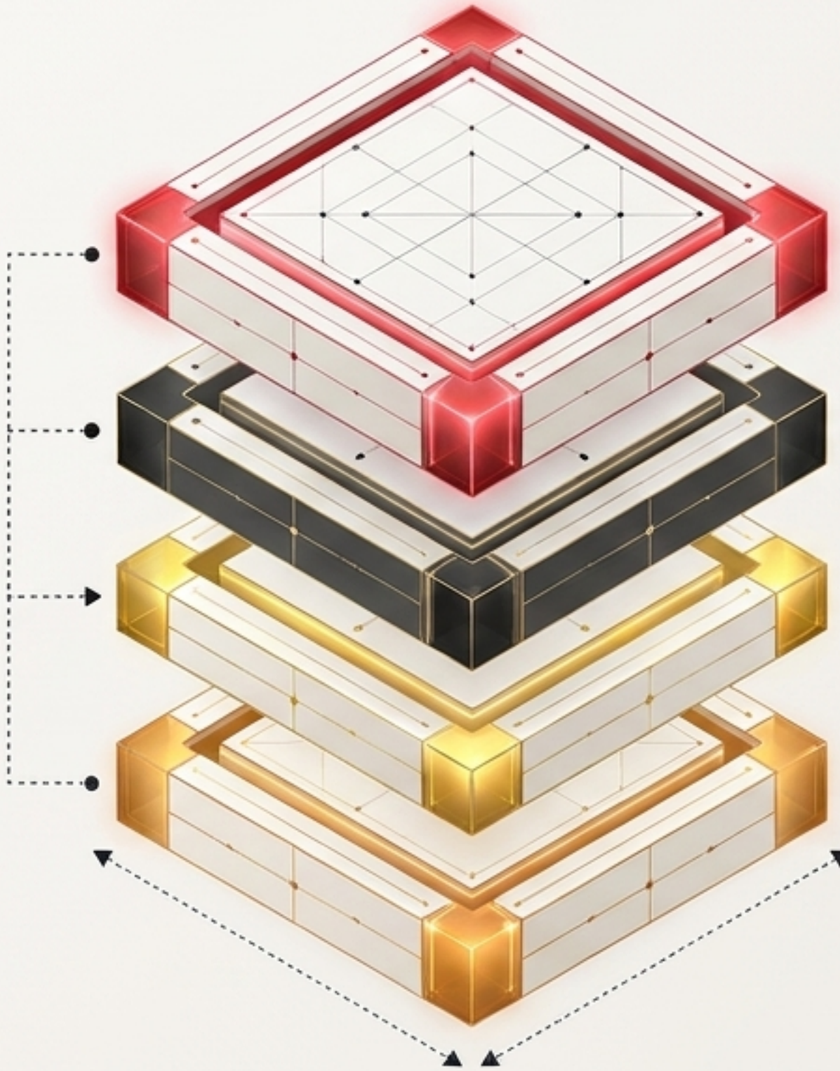

Investor Overview · 2026 | Singapore
Support Desk · SGT

Capital at risk. CoreChain does not claim authorisation or regulation by any financial regulator. Bitget is an independent third-party execution venue. Information, not an offer or financial advice.

Gemini Notebook

One platform. Four clear layers.

01 / One daily plan.

A single Daily 2% Plan with a $10 minimum, no maximum, and a 24-hour activation wait.

02 / Visible execution.

Orders route through authorised Bitget execution connectivity and are reconciled before the ledger updates.

03 / On-chain payouts.

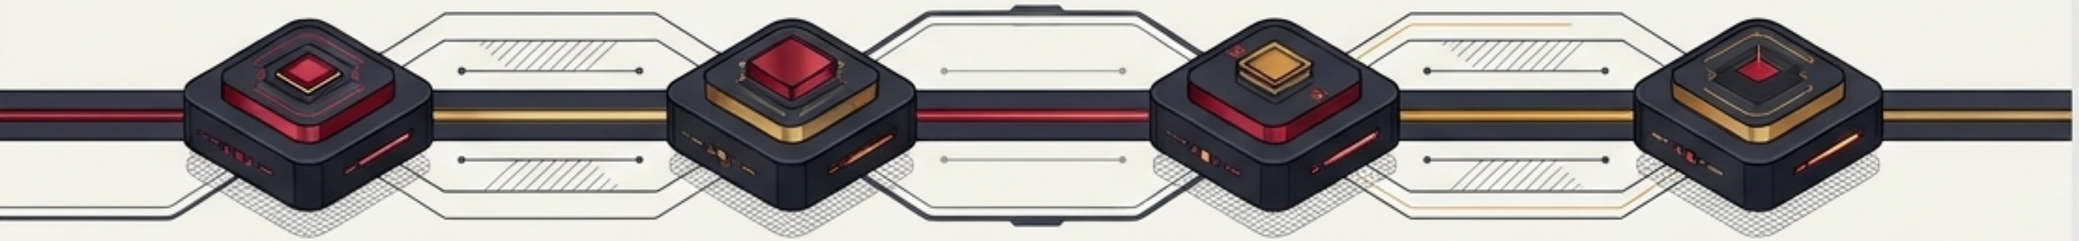

Completed BEP20 withdrawals carry a BNB Smart Chain transaction hash for BscScan verification.

04 / 15-level income.

Approved downline deposits can generate one-time commission across 15 levels (15% combined rate).

Gemini Notebook

From account to verified payout.

Step 01

Create your account.

Register with the platform invitation code (**corechain**) or a sponsor code, then sign in **securely**.

Step 02

Choose the plan.

Review the Daily **2%** Plan terms and use the dashboard **calculator** before funding.

Step 03

Fund and activate.

Submit a deposit. After administrator **approval**, the **24-hour** eligibility window begins.

Step 04

Track and withdraw.

Follow eligible **profit**, downline **income**, and withdrawal **hashes** in the **ledger**.

`Start Small:` **$10** minimum.

`Activation:` **24h** wait after approval.

`Ledger:` **Every step** recorded.

Gemini Notebook

The Dual Engine: Plan vs. Network

The Daily 2% Plan (Passive)	15-Level Income (Active)
Source of Yield: Based strictly on your own eligible, approved deposits.	**Source of Yield:** Based strictly on approved downline deposits. (No self-income).
Timing: Calculated at most once every **24 hours**.	**Timing:** One-time payout per downline deposit, instantly upon approval.
Activation Rule: Requires a 24-hour waiting period after approval.	**Activation Rule:** Requires downline partners to actively fund their accounts.
Limits: **$10** minimum, unlimited maximum.	**Limits:** Up to **15%** combined commission spread across **15** active levels.

Gemini Notebook

The Daily 2% Plan parameters.

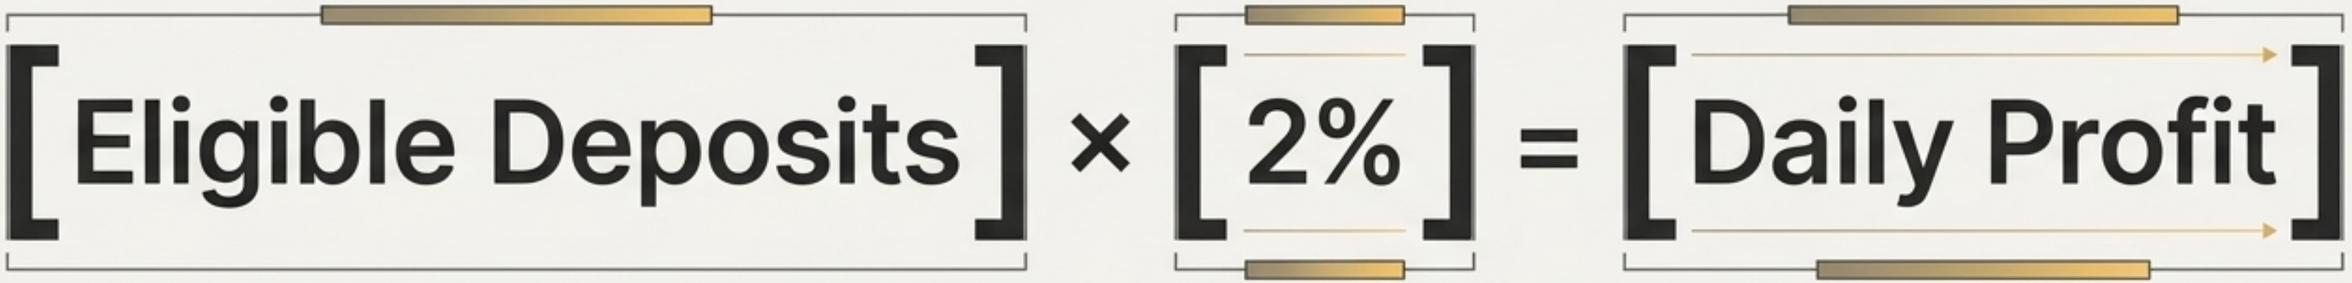

Deposit from $10, add funds at any time, and earn 2% every 24 hours after each deposit completes its 24-hour waiting period. The same terms apply to all investors.

```
Daily rate: 2.0% (Illustrative, not guaranteed. Capital remains at risk).
```

Gemini Notebook

Calculating the daily eligible base.

Only approved deposits older than 24 hours are included. Profit is credited at most once per 24-hour cycle.

Compounding Note: If profit is withdrawn, the eligible deposit base does not grow. Adding a new approved deposit (reinvestment) can increase the base.

Eligible Deposit	Daily 2%	30 Days	90 Days
$100	$2.00	$60.00	$180.00
$1,000	$20.00	$600.00	$1,800.00
$5,000	$100.00	$3,000.00	$9,000.00

Disclaimer: Table assumes deposit remains eligible every cycle, no withdrawals, no reinvestment. Illustrative only.

Gemini Notebook

Four levers to control earning potential.

Dial 1:
Add eligible deposits.

A larger approved deposit base produces a larger 2% daily calculation.

Dial 2:
Keep deposits eligible.

Ensuring approved deposits pass and maintain the 24-hour wait.

Dial 3:
Build network volume.

Generating one-time commissions from downline deposits across 15 levels.

Dial 4:
Reinvest deliberately.

Adding profit back as a new deposit to enlarge the base (increases exposure/risk).

What slows growth:

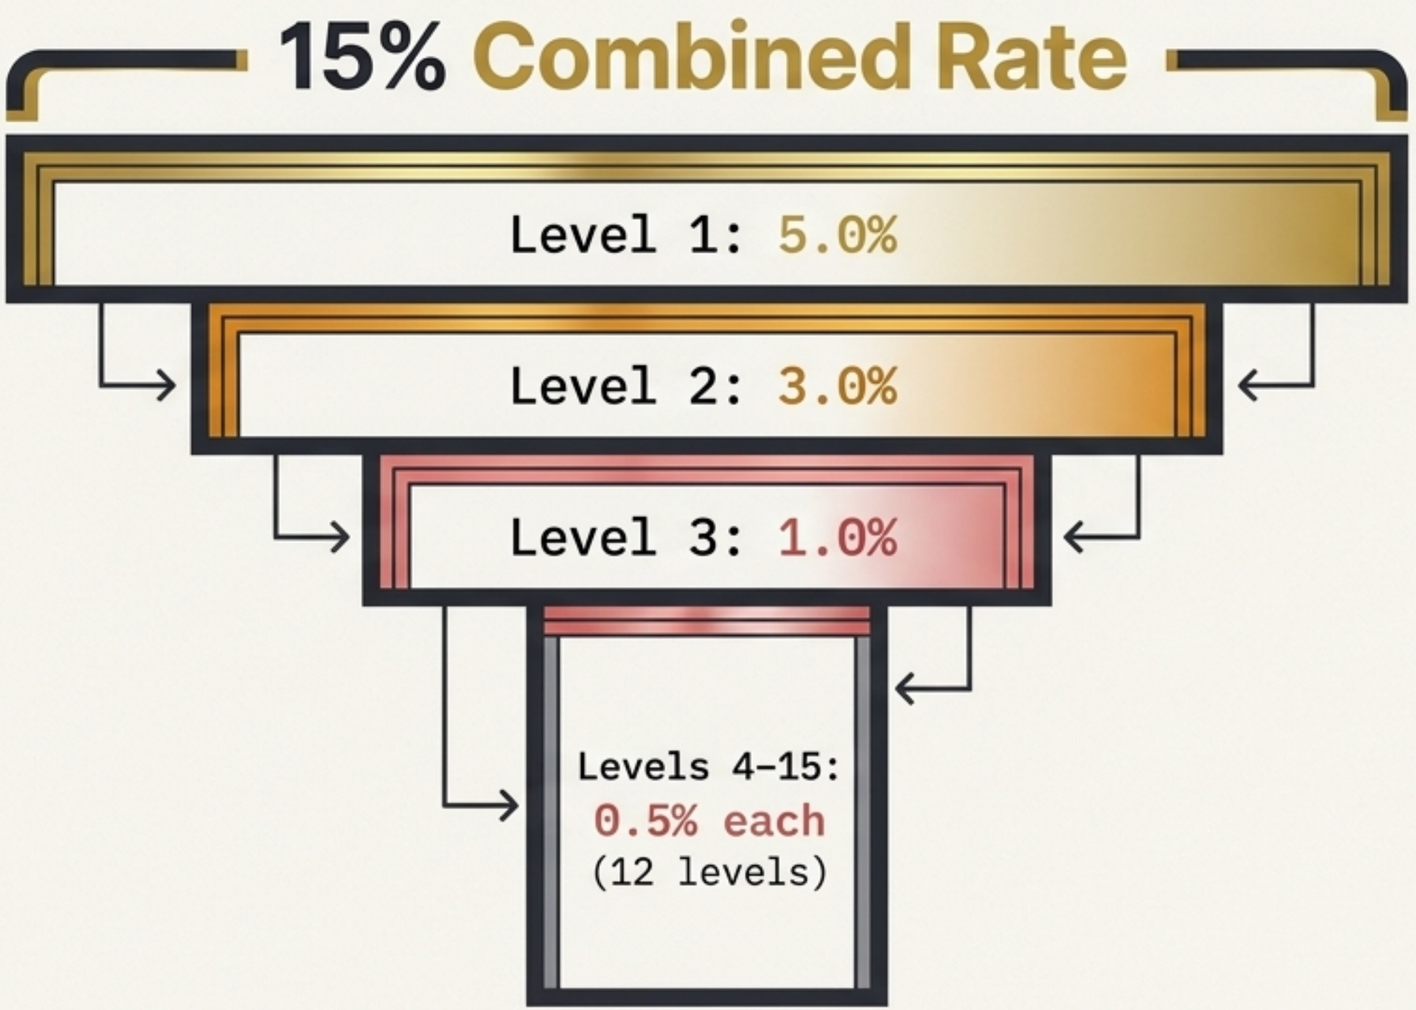

Withdrawing profit: Base stays lower.

Pending status: No profit until approved.

24-hour wait: Not yet eligible.

Gemini Notebook

A verified 15-level income network.

Core Mechanics

- One-time referral commission on approved downline deposits.
- Not a daily ROI.
- Not paid on your own deposit.
- Requires a separate approved deposit at each active depth level.

Gemini Notebook

$150 across a full 15-level chain.

Context: Assuming one approved $1,000 deposit by a different partner at every single level.

Level 1: 5% of $1,000 = **$50.00**

Level 2: 3% of $1,000 = **$30.00**

Level 3: 1% of $1,000 = **$10.00**

Levels 4–15: 0.5% × 12 = **$60.00**

Total Level Income: $150.00

Critical Constraints

- **No self-income.**
- **No guaranteed depth** (partners must actually join and fund).
- Withdrawable balance is subject to KYC and platform withdrawal rules.

Gemini Notebook

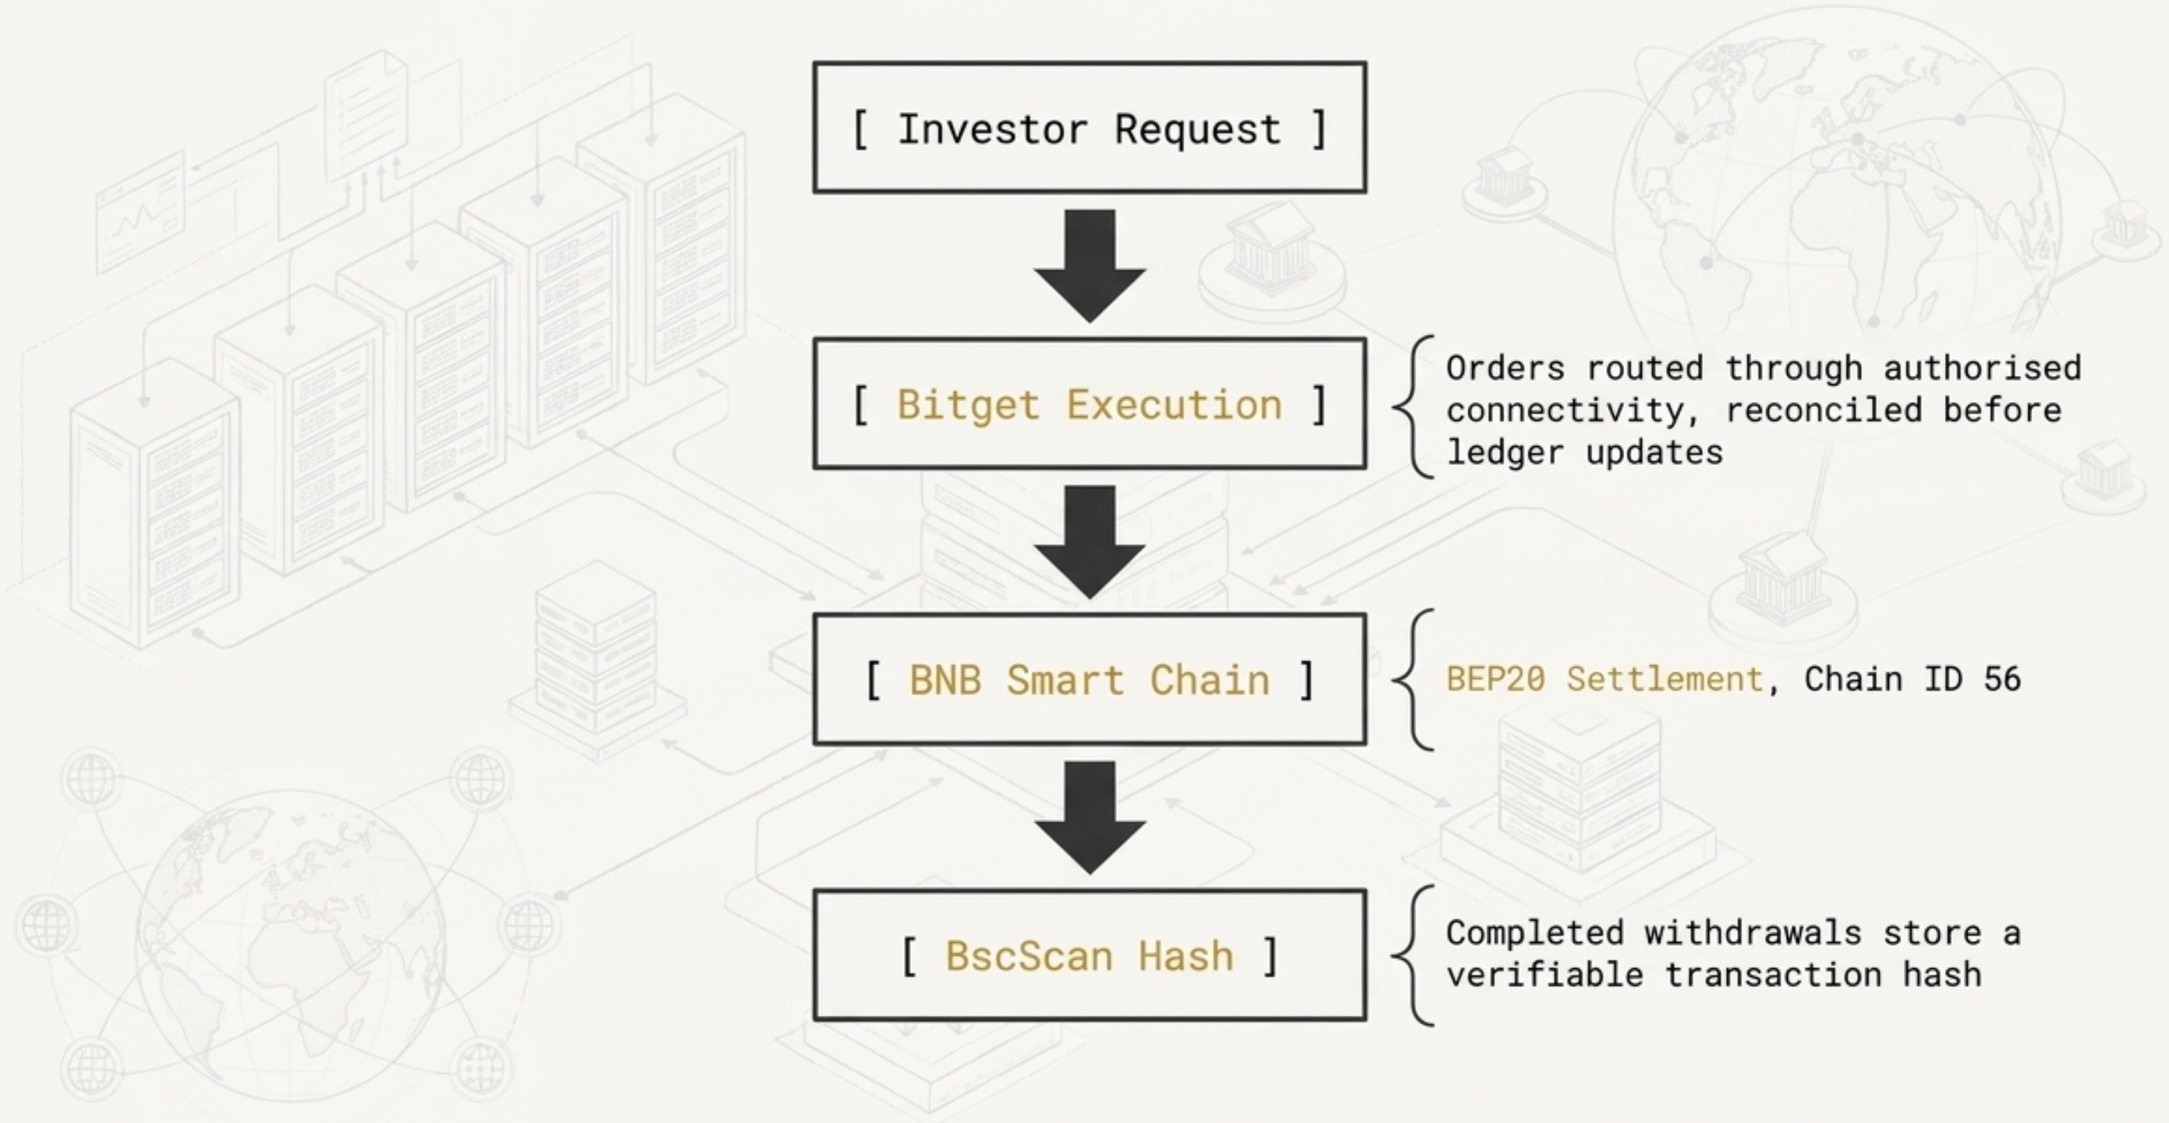

Money movement with clear rules.

DEPOSITS (Inflow)	
Minimum: $10 **Maximum:** Unlimited	**Status Flow:** Pending → Approved (Admin review required, unique reference needed). **Eligibility:** 24 hours after approval.

WITHDRAWALS (Outflow)	
Minimum: $10 **Request Limit:** Once per 24 hours. **Gate:** KYC approval required first.	**Handling Fee:** 2% added to request (e.g., $100 request = $102 deduction). **Settlement:** BEP20 only (0x address with 40 hex characters).

Gemini Notebook

Execution and settlement, made visible.

Independent Venue Notice: Bitget is a third-party exchange. Its services do not mean that Bitget endorses, guarantees or insures CoreChain products. Transfers to wrong networks/addresses may be irreversible.

Gemini Notebook

Protection around the account and the payout.

01: KYC before withdrawal

Identity verification must be approved before withdrawal access is enabled.

02: 2FA & session security

Optional TOTP two-factor authentication, hashed passwords, and HTTP-only signed sessions.

03: Atomic admin lock

Withdrawals move from pending to processing under an atomic lock, preventing double approval.

04: Server-side key isolation

The BSC signing key is read-only by the server-side withdrawal service and never shown in the browser.

On-chain verification: A broadcast transfer is only marked completed after configured confirmation.

Gemini Notebook

Your numbers, in one place.

Daily ROI View

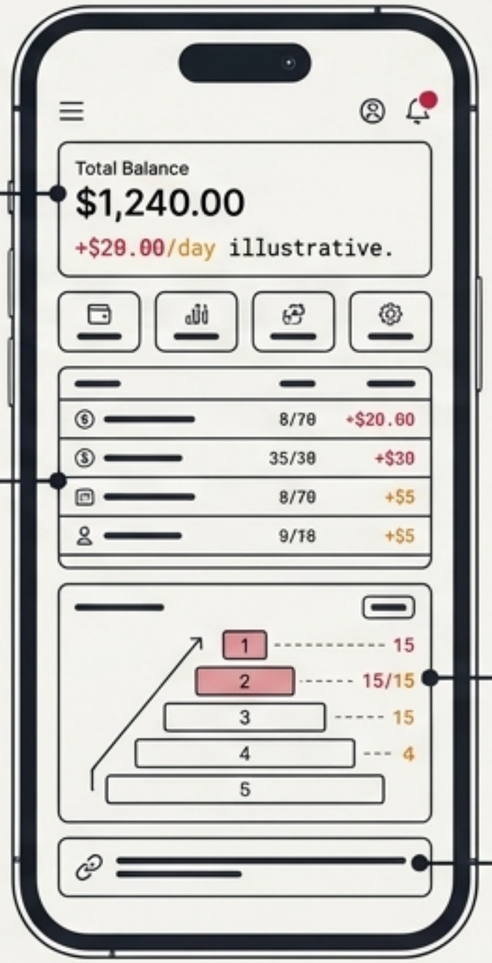

Tracks eligible deposits, projected daily profit, and the next 24-hour cycle timer.

`Total Balance $1,240.00 | +$20.00/day illustrative.`

Transaction Ledger

Tracks deposits, withdrawals, profits, and level commissions.

`Daily profit +$20 | Level 1 income +$5.`

15-Level Planner

Shows active depth (e.g., 15/15) and approved volume.

BEP20 Payout Trail

Withdrawal hashes open directly on BscScan.
